

Long Term Rate Lock!

Choose a to-be-built Benchmark home and lock in your interest rate for up to six months.

It's true. When you use one of our preferred lenders you can rest easy knowing your interest rate is protected for up to six months. Now you can go ahead and choose the home and location you want most without having to keep your fingers crossed that rates don't rise while your dream home is being built. What's more, you won't miss out if rates go down. Should rates go lower within 30 days of your closing date, you can float down to a lower rate.

These special long-term rate locks apply to both fixed and adjustable rate new construction loans. It's your choice!

Ask your Benchmark sales representative for more information today!
